DETAILED ACTION

Applicant's election without traverse of the invention of Group II in the reply filed on 5/13/05 is acknowledged.

Claims 1, 2, 13 and 14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/13/05.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by DE '878.

The german patent documents disclosed in the international search report shows a plurality of trains Z1 and Z2 travelling along a line S that are virtually connected and transfer data between them in order to maintain their spacing by system AS.

Claims 3, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by McCrary '724.

The public transport system of McCrary discloses an elevated track for vehicles that communicate with a master computer to control the spacing of the speed of the vehicles, which are held constant, as disclosed in column 13.

Art Unit: 3661

Claims 4-8, 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
